Profile!

I'm a passionate Full Stack Developer with strong core CS fundamentals and proficiency in Data Structures Algorithms. Over the past year, I've gained industry experience using tools like Jira, Hubstaff, and Git to build robust, scalable applications. I've successfully delivered diverse freelance projects — from building intuitive UIs to architecting complex backend systems — each with a unique goal and technical challenge. I thrive in fast-paced environments and take pride in writing clean, maintainable code.

Education

Rajasthan Technical University, B.TECH in Computer Science and Engineering August 2021 – July 2025

- CGPA: 9.3/10.0

Experience

Frontend Developer, Arhan Technology, Bhilwara June 2024 – Aug 2024

- Integrated dynamic frontend components for an international trade platform, connecting APIs and SQL databases to ensure real-time data flow.
- Delivered a clean, responsive dashboard UI for seamless user experience.

Full Stack Engineer, Jediteck, California, Remote Sept 2024 – Present

- Played a key role in developing a 24*7 Support Custom AI agent integrated with Discord embed via script for providing store related solution
- Plus a GCP-based PDF processing pipeline (auto triggers for new drive files) that flags missing, incorrect, or mismatched fields based on training data
- Added an SDQI index calculator for banks with actionable recommendations.
- Gained strong exposure to team collaboration, Jira, and Hubstaff, along with clean code , backend logic like implementing spiff workflows, real-time data extraction and processing and project management best practices.

Projects

Trevia Apparel treviaaparel.com

- Developed a MLM-based e-commerce platform with complex chain linking and commission logic with real-time wallet pop-ups on challenge completion or downline purchase.

SawaiBhoj Resort sawaibhojresort.com

- Built a booking system with auto-allocation for events (no overlapping rooms) Optimized for SEO via robot.ts, sitemap URLs ,meta tags, and integrated Google Search Console analytics.

GenQuizAI genquizai.com

- Automated Google Quiz and Form creation from PDFs, images, and text: extract content using PDF parsing, generate fully customizable single/multiple-choice quizzes WITH control question count, difficulty level, option type.
- or create surveys, RSVP and feedback forms from a single-line prompt — all exportable to Google with one click.

SBG Marbles sbgmarbles.com

- Crafted a clean, premium UI with SSR and rapid load times using react-three-fiber, GSAP, Framer Motion, Bento Grid. Implemented SEO with robot.ts, sitemap URLs, image optimization, meta tags, and Google Search Console analytics.

Technologies

Frontend: ReactJS , NextJS , Tailwind , HTML , CSS , Bootstrap , ThreeJS , GSAP , Framer Motion , SASS.

DevOps , Cloud: Docker , AWS , Vercel , Render , Git , CI/CD.

Backend: ExpressJS , NodeJS , Redux , Context API , FastAPI , WebSockets , JWT , Cron Jobs.

DataBase: Mongodb , PostgreSQL.

Programming: Data Structures , Algorithms , Java , JavaScript , TypeScript.

Tools: SEO , Github , Jira , Hubstaff , Postman , Google Analytics.
